POWER BLADE

Just put on it will be a dozer

Scrap and earth and sand

① High strength with cast integral structure

This product is made of the integral structure of the casting, the strength is much higher than the bucket welded by cutting the plate.

② It pushes powerfully

A casting with a weight of 320 kg, which was set as a replacement blade, forcefully pushes out snow and earth and sand.

③ It corresponds to many kinds of forks

This product is inserted into the nail of a forklift and fixed only with a ratchet belt. You can install any type of forklift up to 12 cm wide nail.
